

Pooja Gujwar

Full Stack Developer (MERN Stack)

Email: gujwarpooja@gmail.com | Github: <https://github.com/PoojaGujwar>

LinkdIn :<https://www.linkedin.com/in/poojagujwar>

SUMMARY

Full Stack Developer with hands-on experience in building MERN stack applications and REST APIs. Skilled in React.js, Node.js, Express.js, MongoDB, and MySQL with knowledge of authentication, CRUD operations, and backend integration. Currently working on real-world projects including HR-CRM systems and improving problem-solving and full-stack development skills.

EXPERIENCE / TRAINING

Full Stack Developer Trainee Eway Company | Mar 2026 – Present

- Learning and implementing PHP, jQuery, and AJAX for dynamic web applications
- Handling form submissions, validations, and asynchronous data fetching using AJAX
- Building small modules like login/register with backend integration
- Improving debugging skills and *writing clean, maintainable code*.

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, [React.js](#), JavaScript, TypeScript, Redux, Bootstrap, jQuery
 - Backend: Node.js, Express.js, REST APIs, [Socket.IO](#), PHP, JWT
 - Database: MongoDB, MySQL
 - Tools: Git, GitHub, Postman
-

PROJECTS

HR-CRM Management System

Developed a full-stack HR-CRM application to manage employees, clients, candidates, and recruitment workflows through a centralized dashboard.

Key Features & Contributions:

- **Authentication & Security:** Implemented secure Login, Registration, Forgot Password, and Reset Password functionality using **JWT**, **Crypto**, and **Nodemailer**.
- **Admin Management:** Developed Admin Profile Management with profile update and **secure password** change functionality.
- **Employee & Client Management:** Built **CRUD** operations for employee and client records with company and contact details management.
- **Database Management:** Integrated **MySQL database** for efficient storage and management of recruitment and employee data.

Chat App – Real-Time Messaging Application

Developed a real-time chat application that enables users to communicate instantly through a responsive and interactive interface.

Key Features & Contributions:

- **Real-Time Communication:** Implemented instant one-to-one messaging using **Socket.IO**.
 - **Authentication System:** Added secure user authentication and protected routes.
 - **Interactive Features:** Developed typing indicators and real-time message updates for better user experience.
 - **API Integration:** Connected frontend with backend **REST APIs** and MongoDB database.
-

EDUCATION

Bachelor of Technology in Computer Engineering MIT Group of Institutes Ujjain

Graduated: 2023
